Service Notes

1. Type 2 Motor will fit into Type 1 Housing if the following parts are added.

2. New method of installing Blades (For Type 4 Slider Com.)

Loosen the blade securing bolt fully with the hex wrench. Keep the back edge of the blade fitting into the roller and insert the blade between the blade clamp and the slider as far as it will go. Make sure that you are inserting the blade into the proper position.

Fit the pin on the slider in the hole in the blade shank.
 Note:
 The hole in the blade shank will be aligned with the pin on the slider when the blade shank hits against the spring pin on the slider.

Tighten the bolt securely while making sure that the blade will not be extracted even though you try to pull it out.
CAUTION:
 If you tighten the bolt without the pin on the slider fitting properly in the hole in the blade shank, the pin or the blade shank will be damaged. This may cause the blade to be extracted unexpectedly during operation.
