Improved by 20% in air flow efficiency

Fan shape has been changed. Air can be pushed out smoothly with less air flow loss. (compared with our current Fan)

Easy-to-pull recoil starter

Low vibration for reduced operator stress and fatigue

- Vibration to the back of operator is reduced by the 4 damper springs mounted between the engine and the backpack frame.
- Vibration at the handle is significantly reduced by effectively damping transmission of vibration from the engine to the nozzle.

Comfortable backpack harness

- Cushioned back padding and shoulder straps are well-ventilated for effective sweat evaporation.
- Adjustable straps provide a perfect fit for every user.
